

IESCO LINE STAFF SHOULD ENSURE 100% SAFETY SOPs DURING WORK
OVERCONFIDENCE LEADS TO ACCIDENTS.
REFUSE TO WORK IF COMPLETE T&P IS NOT AVAILABLE.
CHIEF EXECUTIVE IESCO ENGR. CH. KHALID MAHMOOD

Islamabad: 09th Sep, 2025

According to IESCO spokesperson, Chief Executive Officer Engr. Chaudhry Khalid Mahmood has said that line staff are valuable assets of IESCO and protecting their lives during work is the top priority of IESCO management and in this regard, they have been ensured to be provided with all safety and security equipment. He told the line staff that the happiness of their family is linked to them, so they should ensure the safety of themselves and others while working on power lines and ensure the use of safety equipment such as rubber gloves, boots, helmet belts and other safety equipment. Start work after taking PTW and earthing the line from both sides and if the conditions are not safe or safety equipment is not available, they should refuse to work because life belongs to Allah Almighty. It is a beautiful gift and its protection is our first responsibility. He told the field officers to promote safety culture in the IESCO region and to achieve this goal, organize safety lectures and seminars and more line staff must be checked during work and strict departmental action should be taken against line staff who do not follow safety SOPs because we have to protect human life at all costs.
